

BAS & CONTROL SOLUTIONS

CONTROLS THAT MAKE SENSE.

Our Building Automation Systems (BAS) and Control Solutions seamlessly integrate your HVAC network to accurate climate control, proactive maintenance, and streamlined building management. Powered by universal technologies like BACnet and the Niagara Framework, our solutions deliver reliable performance from initial design to post-installation support—enhancing occupant comfort, reducing operational costs, and providing complete system control.

OUR CORE SERVICES

EXPERT PROJECT EXECUTION

Timely, accurate documentation delivery, expert installation by factory-trained technicians, and 24/7 customer support.

SYSTEM INTEGRATION & TESTING

Integrate building controls with new or existing systems and conduct comprehensive testing to ensure all equipment functions as designed.

CUSTOM DESIGN & FUNCTIONAL INTERFACES

An intuitive user interface designed for seamless operation by building operators, customized to meet your building's unique needs.

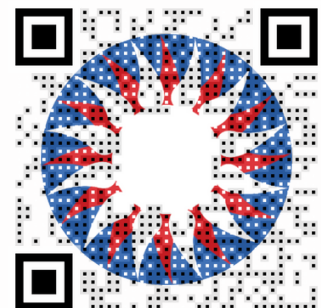

PREVENTATIVE MAINTENANCE & MONITORING

Post-installation support includes regular maintenance, remote monitoring, utility metering, and a la carte software upgrades.

OUR COMMITMENT TO YOU

- ✓ Comprehensive Support at Every Project Stage
- ✓ Transparent Systems That Put You In Control
- ✓ Custom Interfaces with Tailored Graphics
- ✓ Reliable Systems That Evolve With You
