

Thermosystems Project Profile:

**AIR FRANCE VIP LOUNGE
O'HARE INTERNATIONAL AIRPORT**

Chicago, IL | 2025

NEW BEGINNINGS

A space built for relaxation and function. This was the vision behind the first Air France VIP Lounge at O'Hare International Airport. Seeking a cost-effective and reliable HVAC solution, the project team required equipment that could deliver dependable performance while maintaining consistent comfort for travelers.

ACTIVE COLLABORATION

Working alongside Environment Mechanical Services, our engineers focused on detailed coordination from the start. By evaluating electrical requirements, controls, equipment configuration, and more, the project team established a clear path for installation. Early alignment reduced risk, streamlined planning, and supported build-out success.

EQUIPMENT INSTALLED

(12) Daikin Chilled
Water/Hot Water Fan
Coil Units

THE RESULT

A dependable HVAC solution was delivered to the lounge, ensuring a comfortable, safe, and functional environment for guests and staff.

As the lounge continues to evolve, our team is proud to support future phases of the project.
